## **CANVAS WINS ARMY KNOWLEDGE BASED SERVICES CONTRACT**

**[HUNTSVILLE, AL]** - Canvas, Inc. has been awarded an Indefinite Delivery, Indefinite Quantity (IDIQ) contract worth \$1.5 billion to provide support services under the Recruitment, Management and Administrative Support (R-MAS) domain for the U.S. Army HR Solutions (HRS) contract vehicle as part of the Army's Program Executive Office Enterprise Information Systems (PEO EIS) organization.

"Canvas will provide services needed to provide a total support solution for the Army's HR acquisition needs," stated Canvas CEO Jami Peyton. "Competition for this new contract was steep. We competed against thirty-seven other small businesses and are proud to be the only small business headquartered in Alabama to be selected."

HRS R-MAS is a new contract and is the preferred source for Army-wide utilization to provide the full life cycle of personnel services to Defense personnel. Under this contract, support to the Army's policies, programs, and systems will focus on multiple functional areas, to include Professional Program Support, Data Analysis, Information Technology (IT), Business Management Services, Logistical/Operational Support, Training, Technical Writing, and General Administration.

"We have a long history as a technical company. Providing solutions for the warfighter through this contract utilizes our technical and advisory capabilities in addition to providing streamlined acquisition and cost savings for our customers," Peyton stated.

The period of performance for this contract is ten years with an estimated completion date of Sept. 3, 2028. The U.S. Army Contracting Command, New Jersey, is the contracting activity.
